Implant Treatments			
Remarks :			
An implant root could be set on the place of an extracted tooth not earlier than 5-6 months after an extraction. After the setting of an implant root there has to be respected a healing and integration time to the jawbone of around 3 months (lower jaw) and 5-6 months (upper jaw). Therefore the whole implantation treatment will make two visits in Gdansk necessary.			
The total price of an implant including the implant root, surgical work, dental technician work, standard Titan implant abutment and standard porcelain crown is mentioned here for your price comparison :			
System Prowital (Germany)	4550		
System Implant Direct Legacy (USA)	4550		
First visit :			
1-3 days for the setting of the implant roots			
One Dental Implant (implant root, including surgical work, x-ray, anaesthetics)			
System Prowital (germany)	2500		
System Implant Direct Legacy (USA)	2500		
System Astra Tech	on request		
Second visit :			
3-6 working days, depending on the amount of implants and on the chosen material for crowns.			
Standard abutment Titan, Prowital	950		
Standard abutment Titan, Implant Direct Legacy	950		
Zirconium abutment, Camlog	on request		
Zirconium abutment, Alpha Bio	1300		
Zirconium abutment, Implant Direct Legacy	1300		
Abutment, Attachment "Connector" Gold **	**1300		
System Astra Tech	on request		
Important: There could be a certain discount for more than 2 implants, more than 5 implants, or more than 7 implants, you will see it on your personal offer.			

Prices are valid in Polish currency; prices in other currencies depend on the actual exchange rate.
Prices are depending on the actual situation of the patient and treatment plan discussed with the dentist after the first examination.
